PROFESSIONAL SUMMARY

Aspiring Data Scientist and Software & Immersive Developer with hands-on experience in data analysis, machine learning, visualization, and AI-driven content creation. Skilled in Python, AI prompt engineering, and creating AI-generated images, videos, and advertising creatives using GPT, Gemini, Veo, Kling, Seedance, and Wan. Experienced in developing creative prompts for engaging visual content and applying AI-driven solutions to real-world projects. Passionate about AI, immersive technologies, and creative digital content.

WORK EXPERIENCE

Digifox Studio — Software & Immersive Developer | May 2026 – Present

- Developing immersive simulation systems, interactive applications, and real-time backend integrations.
- Designing data-driven interfaces and intelligent systems tailored for user engagement and precision.
- Developed and refined prompts for AI media generation tools including GPT, Gemini, Veo, Kling, Seedance, and Wan to produce engaging visual content and advertisements.
- Created AI-generated images, videos, and advertising creatives using detailed prompts tailored to campaign and content requirements.

PROJECTS

Immersive CPR Training System

Tools & Technologies: Unity 3D, C#, 3D Models, Animations.

- Developed an interactive CPR training simulation with realistic scenarios and user interactions.
- Implemented C# scripting for training logic, timed CPR sequences, and real-time performance feedback.

Credit Rating Classification

Tools & Technologies: Python, Pandas, scikit-learn (Logistic Regression, Random Forest), XGBoost, SMOTE.

- Used German Credit dataset to predict customer creditworthiness; addressed class imbalance using SMOTE.
- Applied Logistic Regression, Random Forest, and XGBoost models. Best accuracy achieved: ~84% with ROC-AUC evaluation.

Fraud Detection

Tools & Technologies: Python, Pandas, scikit-learn, Logistic Regression.

- Built logistic regression model to detect fraudulent transactions.
- Performed EDA and applied feature encoding techniques. Evaluated performance using confusion matrix, precision, recall, and F1-score.

TECHNICAL SKILLS

- Languages & Cloud: Python, Java, SQL, AWS
- Tools & Libraries: Power BI, Tableau, MS Excel, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
- Reporting & Version Control: PowerPoint, Tableau Storyboards, Google Slides, Git, GitHub
- Design & Creative: Figma, Canva
- AI Media: GPT & Gemini Image Model Prompts, Veo, Kling, Seedance, Wan Video Prompts, AI Image & Video Generation, Advertising Creatives

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science and Engineering [July 2021 – June 2025]
CK College of Engineering and Technology | CGPA: 7.93

Higher Secondary (12th Grade) [July 2020 – May 2021]
Government Girls Higher Secondary School | Percentage: 85%

Secondary School (10th Grade) [July 2018 – May 2019]
Government Girls Higher Secondary School | Percentage: 84%

INTERNSHIPS

- Completed 6 months internship at Netzwerk academy about data science.
- Completed a 1-month internship at Cavin InfoTech about Unity Development.
- Completed a 14-day internship in Syscorp Technologies about WebSite Development.
- Completed internship on BlockChain Technology & 1-month internship at Fintech Point about Front end Development.

SOFT SKILLS

Problem solving | Adaptability | Time management
